Office Action Summary	Application No. 10/609,053	Applicant(s) GAMBALE ET AL.	
	Examiner Catherine S. Williams	Art Unit 3763	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group I in the reply filed on 8/14/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 17-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/14/06.

Amended claim 16 and newly submitted claim 19 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: these claims are directed to a method of detecting data whereas the original claims were to a method of relieving symptoms of ischemia

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 16 and 19 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

Art Unit: 3763

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 12-13 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Segal et al (USPubN 2003/0100886). Segal discloses a method for treating ischemia that includes providing a catheter having a proximal end and a distal end and a radially extendible tissue engagement mechanism, navigating the catheter so that the distal end is adjacent the myocardium, causing the mechanism to extend into engagement with the myocardium and delivering a therapeutic agent while maintaining the tissue engagement mechanism in its extended position. See paragraphs 0062+ and figures 11+.

Claims 12-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Makower et al (USPN 6,602,241). Makower discloses a method for treating ischemia that includes providing a catheter having a proximal end and a distal end and a radially extendible tissue engagement mechanism, navigating the catheter so that the distal end is adjacent the myocardium, causing the mechanism to extend into engagement with the myocardium and advancing a tissue implant while maintaining the tissue engagement mechanism in its extended position.
